Technical Skills

Software Languages:

- JavaScript
- Python
- CSS
- HTML
- TypeScript
- SQL

Frameworks:

- React
- Flask
- Bootstrap

Database:

- PostgreSQL
 - Node.js
 - Firebase
 - SQL
-

Additional Skills

Languages:

- Spanish
 - Japanese
-

Interests

Martial Arts;
Muay Thai and Jiu Jitsu

Projects

Crypto Tracker

Technologies - Javascript, React, JSX

- Built crypto tracking app that utilized Javascript and React
 - Integrated CoinGecko API to retrieve current cryptocurrency information and prices while extracting the data using Axios to validate information in application
 - Employed the use of Javascript, Typescript, and CSS to display API information in a sorted watchlist
 - Optimized the use of Typescript to add separate info cards for all currencies
-

Experience

Coding Temple / Software Engineering

March 2022 - May 2022, Remote

Technologies: HTML5, CSS3, Javascript, ReactJS, Bootstrap, React API, Flask, Python, PostgreSQL

- Built an E-commerce website using Flask while programming PostgreSQL as the database to validate inventory and process purchases
- Generated weather app widget using the Open Weather Map API which offered us current locations, temperatures, and weather descriptions for the users city of interest
- Used Javascript and CSS to amplify visual aesthetics in widget
- Crafted a ticketing system by leveraging Bootstrap with HTML and CSS to create a seamless user experience
- Created an client facing API using Flask while leveraging Bootstrap to manage Log-in capabilities and user registration
- Optimized an API by converting it into a React application utilizing javascript and typescript
