- English

Projects

[Capstone] / Crypto Trading Bot 1 and 2

Technologies - Python/TypeScript, Javascript, CSS, HTML

- Built trading bot that runs on python and another that runs on typescript
 - Features: Trading, Margin Trading, Arbitrage, Lending, and Backtesting
 - This will lead the future to acceptance of crypto to the common trader
-

Experience

Coding Temple / Software Engineering

March 2022 - May 2022, Los Angeles, CA

Technologies: HTML5, CSS3, Javascript, ReactJS, Bootstrap, React API, Flask, Python, PostgreSQL

- Built an E-commerce website using Flask. Programming flask and PostgreSQL as the database
- Generated weather app widget using the Open Weather Map API, CSS, and javascript to update the location, temperature, and weather description for the user's city of interest
- Crafted theater ticket website with Bootstrap, HTML and CSS
- Created an Initial D API using Flask and Bootstrap. Log-in capabilities and user registration included
- Optimized previous Initial D API by converting it into a React application utilizing javascript and typescript
